Lower Cost of Ownership

- Modern design techniques in combination with long life of components result in a long service interval reducing the total cost of ownership.
- Vehicle Control Module manages various truck and operator functions allowing easy trouble shooting and pin pointing of problems.
- LCD display provides extensive information on truck operation and maintenance state. It also indicates service requirements to prevent unexpected down time and cost due to unscheduled maintenance and service.
- LED lights on the front work lights and front/rear combination lights reduce energy consumption and maintenance costs.
- Robust and durable chassis with full belly guard construction that protects the engine compartment from dust, water and dirt.

Unmatched Productivity

- State-of-the-art LPG engine with electronic engine management system with 3-way catalytic converter for great performance, low noise and emission levels. This powerful proven industrial engine also brings efficient fuel usage.
- Fully floating powertrain layout to lower the centre of gravity, increases truck stability and residual lifting capacities.
- Reliable, high performance diesel engine, with low emission levels and low fuel consumption.
- Its compact design makes this range suitable also in aisles with reduced dimensions.
- The mast carriage features six bearings, increasing durability and lifting speed while the powerful hydraulic system offers high residual capacities for easy handling of heavier loads.

Safety and Ergonomics

- Presence Detection System (PDS) prevents truck operation when operator is not seated.
- Low noise levels keep the operator concentrated while reducing fatigue in long shifts.
- Fingertip hydraulic controls mounted on a fully adjustable armrest for optimum load handling and easy maneuverability.
- Operator Pin Code to prevent unauthorized usage of the truck
- Automotive style pedal layout for easy and comfortable operation.
- Adjustable steering column with memory position that adjusts to operator's preference for comfortable operation.
- Low step in chassis for easy on and off access.
- Good all-round visibility and ergonomic layout of all controls improves comfort minimizing fatigue of the operator.
- Handgrip mounted at the rear of the overhead guard with a horn button increases safety and reduces back strain and fatigue in applications with repetitive reversing.

Options

- Elevated exhaust
- Additional working lights and revolving lamps
- Manual hydraulic controls
- Heavy duty steering link
- Indicator kit for monitoring condition of air cleaner and level of brake fluid and coolant
