TECHNICAL SPECIFICATIONS

Maximum Platform Height: 65' ground to platform floor.

Working Range: 70' max. height and 62' max. side reach.

Work Platform: 40"x60" EZR endhung work platform with 40" high rails. Equipped with two safety lanyard attachment loops and two safety harnesses and 72" lanyards. Platform capacity 500 lbs.

Platform Leveling System: Hydraulic "closed" system consisting of twin platform cylinders interacting with a boom-actuated master cylinder mounted in boom support turret. System provided with factory-set relief valves to compensate for oil expansion or overload during platform leveling operation. Remote releveling controls provided in platform and at ground controls to give precise releveling capability.

Platform Controls: Three individual proportional electronic controllers meter pilot-operated, pressure-compensated modulating valves. Remote controls for boom operations from platform operate from a removable remote control box. Hi/Lo range, start/stop and engine speed toggle controls are also located at platform. Electric remote control cable extends through the electrical slip ring to cable carrier on side of boom to extending boom sections.

Lower Controls: Mounted on roadside of turret.

Outrigger Controls: Parallel opencenter stack valve for lever-operated control of right and left outriggers. The outrigger valves are mounted at the rear, under each corner of the bed with roadside valve controlling roadside outriggers and curbside valve controlling curbside outriggers.

Outriggers: "A" type auxiliary outriggers with 12'6" spread. "MH" out and down type main outriggers with 18' spread.

Frame: One piece, all welded, boxtype fabrication with integral outrigger mounts.

Turret: Reverse offset turret is one-piece weldment mounted on turret box. Turret rotates on large diameter ball bearing.

Rotation: Continuous turret rotation with no stops. Hydraulic motor drives turret through self-locking gear box.

Boom: Steel rectangular tube sections. Assembly includes heavy-duty cylinder fittings, pivot pins, and replaceable wear pads.

Boom Extension: Two opposing "piggyback" extension cylinders extend the boom sections.

Lift: One single-acting full displacement, long stroke cylinder, provides smooth and stable boom elevation. Holding valve prevent boom from falling in event of hose failure.

Cylinders: All cylinders use microhoned cylinder tubing, chrome shafts, top grade packing and protective rod wipers. Cylinder-mounted holding valves provided on all load-holding cylinders.

Hoses: All high pressure hoses are wire braid reinforced with a minimum safety factor of 4 to 1.

Oil Tank Capacity: 35 gallon mounted to truck frame on roadside.

Hydraulic System: Operating pressure is 2,500 PSI. System is parallel open center type and is equipped with liquidfilled pressure gauge. Oil is supplied to upper cylinders through hydraulic union in center of turret to cable carrier along side of the boom.

Pump: Gear type, direct mount to truck PTO.

PTO: Heavy-duty, high-speed. Cable engaged from cab.

Cab Equipment: PTO cable or switch

with indicator lights installed in truck cab. Engine speed control and start/ stop installed with control switches in platform remote control box and also located at lower controls. U/L approved 5:BC dry chemical fire extinguisher installed in truck cab.

Operators Manual & Video: Two CDs and one printed copy of operation, maintenance, safety and parts manual provided with each unit. Operational and safety video provided at delivery.

Installation: Unit installed on truck, painted, system and tank filled with oil, tested, inspected, and ready to operate.

Standard Paint: Paint boom and turret red, outriggers red, and bed and boxes black. Top of steel bed painted with black nonskid surface.

Bumper: Bureau of Motor Carrier Safety rear bumper.

Weight: Approximately 19,400 lbs. with 18' steel-floor bed less truck.

Truck Chassis Required: Approx. 156" C.A. RBM 1,600,000 in-lb. per rail, 13,000 lb. front axle and 33,000 lb. GVWR required. Trucks must have increased cooling, heavy-duty front and rear springs, 12V electrical system with high capacity alternator, cab clearance stop/tail/backup lights, and I.D. lamps. Recommended GVWR is minimum for HI-REACH with flatbed only. Contact factory when additional equipment is to be added.

Options:

5,900 lb Capacity Boom Winch

500 lb Capacity Platform Material Handling Jib.

Welder, Air, 110V Lines and More to Platform.

Custom Toolbox Configurations.

confined spaces.

Actual dimensions and truck data will depend on truck selection and axle configuration.

OPTIONS

MH Outriggers With Shortjacking Reduce outrigger spread with MH outriggers behind the cab and Elliott's Automatic Safety Rotation Lockout to operate your HiReach in

Platform Material Handling Jib Equip your HiReach platform with a material handling jib to lift up to 500 pounds right from the platform.

High Capacity Boom Winch Explore the 5,900 lb or 2,000 lb capacity boom winch options that convert the HiReach into a combination aerial work platform and material handler.

boxes.

Outrigger Pad Holders Outrigger pad holders safely store your pads for travel and leave plenty of room for tool

Bed Accessories

Mount a wide variety of tool accessories including welders, power washers, and generators on the bed with lines to the platform.

Platform Accessories

Choose from a list of platform accessories including 110V outlets, welding leads, hydraulic tools, and much more.

Hydraulic 2-Speed Digger

Dig holes without requiring a second truck by using Elliott's stowable planetary digger system featuring 24", 36" and 48" auger options.

Line Body

Let us work with you to customize a line body to secure your tools and supplies the the best way for your application.
