

STINGER 60-100

BOOM TRUCK CRANE

The Load King Stinger 60-110 Boom Truck is unlike any other boom truck in the industry. Boasting a 60-ton (120,000 lbs.) lifting capacity, this telescopic boom reaches up to a max tip height of 118 ft. with a double-keel boom offering a maximum boom length of 110 ft. Adding the 47 ft. jib, the Stinger 60-110 will reach up to 170 ft. maximum tip height. These are the longest, full-power booms in their class. The tilting riding seat provides better visibility for operating.
