Utility Trailers...

Small Trailers With Big Capabilities

Adjustable Hitch

To accommodate a wide variety of towing vehicles, Trail King utility trailers come with an adjustable 4-bolt hitch, available in ball hitch or pintle hitch configuration (depending upon model).

Circuit Breaker

Each electrical function has its own circuit breaker, and each axle is fused separately, for increased safety of operation, less maintenance, and easier troubleshooting.

Safety Headboard

The 4" safety headboard provides an extra dimension of safety and load-hauling security.

Oak Deck

Trail King utility trailers are decked with 1½" nominal oak decking, not pine, and double screwed to crossmembers to prevent cupping. As a result, your deck will stand up to years of rugged service.

Lightweight Ramps

Standard self-supporting 60" ladder-type ramps (inset photo) are lightweight, but strong. Also available in optional wood-filled and spring assist models.

Bolt-on Safety Chains

Heavy-duty safety chains are bolted on, rather than welded, so that their strength and performance are not compromised in any way.

Toolboxes

Two (2) toolboxes are conveniently located at the front of the trailer and are roomy enough to store all your chains and tools.

Tie-down Brackets

Trail King includes four (4) heavy-duty tie-down brackets as standard equipment... so you can securely transport even your toughest loads.

I-Beam Crossmembers

Full-width steel I-beam crossmembers provide load-bearing strength across the entire width of the trailer. And, to resist corrosion, the trailer is painted before the decking is added.

Axles, Tires, Fender

Torflex axles, radial tires, and a new, rounded fender... all standard equipment... deliver a smooth ride, long service life, and attractive appearance.

Protected Electrical System

Trail King utility trailers feature rubber-mounted, shock-proof, sealed lights and rubber grommets wherever wiring runs through the frame... for longer, trouble-free, low-maintenance performance life.
